

2020 ANNUAL REPORT

A publication for the friends of Luke's House Clinic

LUKESHOUSECLINIC.ORG | 504.444.7879

From the Executive Director

Dear friends and supporters of Luke's House,

It is difficult for me to express how grateful I am for the outpouring of support we received during 2020. As many of you know, for years, we've provided free medical care to everyone walking through our doors. In recent years, we've expanded our services to include patient navigation to connect people to long-term healthcare services and health education to help people manage or prevent diabetes, hypertension, and other illnesses. We've been expanding services in order to meet the needs of our community members who are left out of many of these systems and denied resources they desperately need, but the COVID-19 pandemic truly shined a light on these inequities in our society. I cannot thank you enough for responding to this crisis by supporting our grassroots work so we could rapidly support our community members who were most at risk of suffering from the effects of the pandemic.

I would be remiss not to highlight the incredible generosity of our volunteer providers and medical students who allowed us to reopen our in-person clinic in June and who kindly gave their time, resources, and skills to help our community members get the care they needed.

Thank you all for your tremendous support. While there's still work to be done, I'm so proud of the small but mighty Luke's House community for coming together to truly make an impact on the lives of our neighbors.

Adam Bradley
Executive Director

WHAT WE DO

MEDICAL CLINICS AND SERVICES

General Clinic

On Tuesday and Thursday evenings the clinic provides general care services for adults and children, including school and work physicals, tetanus and flu vaccines, blood pressure and blood sugar checks.

GYN Clinic

Focused on gynecological health, breast health, prevention of mother-to-child transmission of HIV/AIDS and other STDs, family planning, nutritional support and education, and routine PAP smears.

Vision Clinic

Free eye exams and glasses. Due to COVID-19, the eye clinic will resume services in 2021.

Asylum Clinic

Clinical evaluations of asylum-seekers are performed to provide forensic evidence regarding an asylum-seeker's legal case. People who receive forensic evaluations are 66% more likely to be granted asylum.

Prescription Assistance

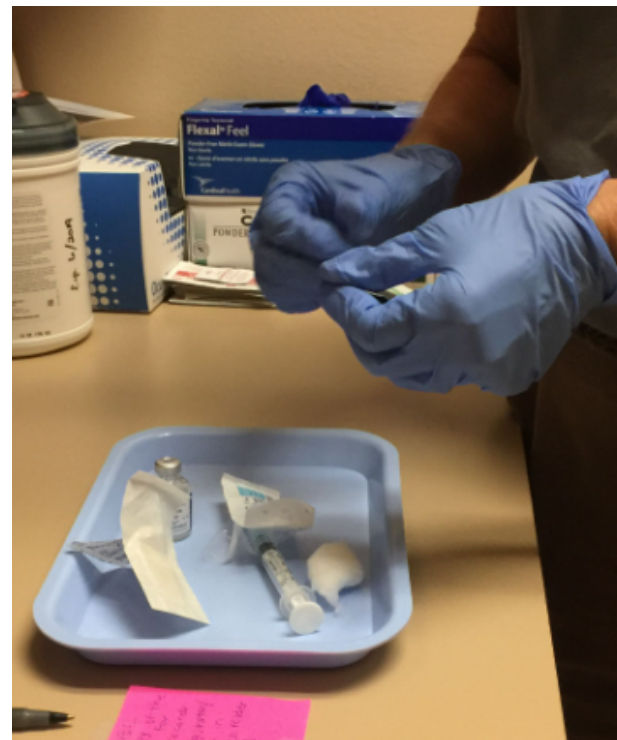

Provides our patients with a free one-month supply of medications.

Patient Navigation

Assist patients to establish primary care, specialty care, social services, and financial assistance or insurance.

Health Education

Health Education programming went virtual on Facebook Live during the pandemic. We interact with hundreds of viewers with healthy recipes, health information on popular topics, such as diabetes, hypertension, pregnancy, etc. Our CareMessage system also provided community members with text messages on the latest COVID-19 information and resources to stay healthy.
